

MTD367
iOS Application Development

Tutor-Marked Assignment 02

July 2026 Presentation

TUTOR-MARKED ASSIGNMENT 02 (TMA02)

This assignment is worth 15% of the final mark for MTD367 iOS Application Development.

The cut-off date for this assignment is **21 September 2026, 23:55hrs**.

Note to Students:

You are to include the following particulars in your submission: Course Code, Title of the TMA, SUSS PI No., Your Name, and Submission Date.

Question 1**Basic Blackjack App**

- (a) Apply the fundamentals of UI/UX design in a Blackjack game application.

Design the workflow and user interface for a Blackjack game app with these views:

- Main Menu screen
- Blackjack table screen
- Player and dealer hand display
- Game result screen

Describe:

- The purpose of each view
- How users navigate between the views
- UI elements used in each screen
- How the interface design improves the player experience on a mobile device

- (b) Evaluate the use of gesture recognisers in a Blackjack game application.

Apply gesture recognisers to support player actions:

- Swipe up to Hit
- Swipe down to Stand
- Double tap to Deal/Restart round
- Long press to Show rules or hints

Explain:

- Why each gesture was selected for its associated action
- How the gesture improves the gameplay experience on a mobile device
- Any usability considerations or limitations when using gesture-based controls

- (c) Experiment with animations and audio feedback and implement them to enhance the blackjack experience.

Examples may include:

- Card dealing animation
- Card flip animation
- Win/lose/bust visual feedback
- Sound effects for dealing cards, winning, losing or button interactions.

- (d) Implement Blackjack game logic.

Your app should include:

- Deck creation and shuffling
- Player and dealer hands
- Hit, stand and bust logic
- Blackjack detection
- Win, lose and draw result

A simplified Blackjack implementation is sufficient. Advanced casino rules such as split hands, insurance, surrender or multiplayer functionality are not required.

Deliverables

1. Report Document

- UI/UX Design and Workflow
 - Explanation of the application workflow
 - Description of navigation between views
 - Explanation of UI elements used
 - Screenshot or mock-ups of the interface
 - Gesture Evaluation
 - Explanation of the selected gesture recognisers
 - Discussion of usability and mobile interaction considerations
 - Animation and Audio Design
 - Description of animations and audio feedback used
 - Explanation of how these features improve player experience
 - Gameplay Logic Explanation
 - Description of the Blackjack gameplay flow and implemented rules
- (40 marks)

2. Runnable Xcode Project

- Deck creation and shuffling
 - Hit, stand and bust logic
 - Blackjack result detection
 - Win, lose and draw outcomes
 - Swipe, double tap and long press interactions
 - Card animations
 - Visual feedback effects
 - Audio feedback
 - Functional navigation between views
 - Good interface layout and usability
 - Readable and organised Swift code
 - Proper naming conventions
 - Appropriate project structure
- (60 marks)

---- END OF ASSIGNMENT ----
